HASSAN.

8. Markets are well supplied.

9. Sown paddy and ragi are in good conditions. Doddaragi and paddy in Belur, Til and Groundnut in Channarayapatna are sown during the week. Potato, cotton and groundnut are being sown in the Arsikere and Belur Taluks. The standing crop of sugarcane in Hassan, Alur, Arkalgud, Holenarasipur and Manjarabad is in good condition and jola, til, groundnut and cotton in the Arsikere Taluk as well.

10. Public health is generally good.

11. Cattle are generally healthy except for Blackquarter at Kakanahalli in Alur and Budunur in Arkalgud Taluks for which preventive measures have been adopted. Pasture, fodder and water are available.

OFFICE OF THE REVENUE COMMISSIONER (N ...), Bangalore, Dated 11th June 1952.

OFFICE OF THE DIRECTOR OF ANIMAL HUSBANDRY SERVICES IN MYSORE, BANGALORE.

Notification dated 16th June 1952.

(HEALTH OF LIVE-STOCK DURING MAY 1952.)

In their order of severity, outbreaks of Rinderpest, Blackquarter, Hæmorrhagic-septicæmia, Anthrax, Foot-and-Mouth, Sheep-pox, Ranikhet and Contagious Goat Pleuro-Pneumonia were encountered in the State during May 1952. Altogether 230 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 233 villages during the previous month. The number of outbreaks was highest in Hassan, Tumkur and Kolar Districts, while Shimoga, Mandya and Chikmagalur Districts were least affected. These diseases accounted for 954 attacks, of which 705 succumbed. The departmental staff conducted 52,014 preventive inoculations and vaccinations against all the above diseases except Foot-and-Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot-and-Mouth disease.

Eight outbreaks of Rinderpest were registered in Pavagada, Hiriyur, Challakere and Devanahalli Taluks accounting for 114 attacks among cattle, of which 62 succumbed. Prompt measures of control were undertaken by the Department to check its spread and 2,980 cattle in the infected villages and 17,618 cattle in 58 neighbouring villages were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 135 villages accounting for 80 deaths, as against 113 villages accounting for 5 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 12,603 animals as against 8,422 animals during the previous month.

The rest of the live-stock remained free from diseases during the month, and fodder and water were generally available throughout the State.

P. M. NARAINSWAMI NAIDU,
2144 *Director.*
